

## THE WORLD OVER

\$10,000 AWARD TO V. MacMillan

**EDMONTON**—While expressing her pleasure to learn that the Supreme Court of Canada had ruled in his favor Monday, Mrs. J. L. MacMillan of Edmonton, the former Vice-President of the former parliament buildings' stenographer was awarded \$10,000 and costs by the Supreme Court from former Premier J.E. Brownlee as damages for seduction.

M.M. Porter, K.C. of Calgary, Mr. Brownlee's counsel announced that his client would make an appeal to the Privy Council on the decision.

### FARMERS' INTEREST IN TRANSPORT RATES SAID TO BE PARAMOUNT

**WINNIPEG**—Appeal to the Dominion Government to consider the interests of the farmer as paramount in legislation relating to grain transportation rates now before Parliament was made in a telegram forwarded to the Hon. C. D. Howe, minister of transport, by the North-West Grain Dealers' Association.

The message dispatched to the Government by the Line Elevator Companies who comprise the membership of the North-West Grain Dealers' Association, reads:

With reference to proposed act to establish a Board of Transport Commissioners for Canada the Convention Elevator Companies who are members of this Association and whose customers comprise more than 50 per cent of Western farmers request that the fixing of uniform rates for steamship companies under Great Lakes will tend to limit competition presently beneficial to cost of movement of Canadian grain and particularly to possibility of additional burden upon Western farmers due to increased freight charges. STOP. Earnestly recommended that interest of hard pressed Western farmer be considered paramount in any legislation or regulations directly or indirectly affecting grain transportation rates.

### FOREIGN VEGETABLE OILS DEPRIVING CANADIAN FARMERS OF \$20,000,000 ANNUALLY

Foreign vegetable oils such as coconut oil, palm oil, cottonseed oil, soybean oil, etc. entering Canada in increasing quantities are having a serious effect in the use of Canadian butter and lard in Canadian kitchens. These imported vegetable oils come from such countries as China, Manchukuo, United States, Egypt, etc. where for the most part rain and labour conditions are far better than in Canada, and conditions of doubtless sanitation exist.

In 1935 these imports were valued at 12,241,000 pounds of shortening, containing no animal fats, which was double that sold in 1932. No new market is being created, as these products are simply replacing Canadian butter and lard in the home market.

The Canadian market could easily absorb all of the butter and shortening produced in Canada, and more; hence the Canadian producer should

## JOHN R. MCWEAN IS RE-ELECTED TO THE MUNICIPAL COUNCIL

1937 Municipal Council To Be Same as Last Year

At the election for councillor in Division three of the Municipal District of Carbon, held on Saturday, February 27, John R. McWean, the retiring councillor, was re-elected by a majority of 20 votes over William H. Levin. Polling took place at the Garrett school and the final count was: McWean 40; Levin 20.

The 1937 council of the Municipal District of Carbon No. 293 will be the same as last year, as follows:

Division One—C. B. Guyon.  
Division Two—J. J. O'Hausser.  
Division Three—J. R. McWean.  
Division Four—H. Offer.  
Division Five—H. H. Crowell.  
Division Six—G. H. Webster.

### PREHISTORIC FOOD

Fishermen from the Atlantic to the Pacific are hopeful that the present effort of the Canadian Government to reduce the consumption of Pacific halibut will result in more abundant catches throughout the world waters than ever before. Though fish has been scarce in the Pacific since the outbreak of the first world war, the present effort of the Canadian Government to reduce the consumption of Pacific halibut will result in more abundant catches throughout the world waters than ever before.

According to leading authorities of the fishing industry this habit is not only harmful to the industry but is robbing people of many advantages. If the people eat more fish throughout the week, they would be assured of fresher fish and they would get it at lower prices. The increased demand for the products of the sea, lake and river would give an impetus to the whole industry, and while retail prices to the public would drop, the price to the fisherman would increase owing to the lessening of the present overhead caused by the public habit of eating fish mostly on Fridays.

Not only the fishing profession but the medical profession is behind the move to encourage people to eat more fish throughout the week. Many medical columnists of newspapers have come on record as to the nutritive and healthful value of fish. With its richness in proteins, minerals and other elements, they say, fish is an important article of diet, as no substitute in other foods and more easily digested.

Only the advantage of this to enable him to produce profitably, instead, however we find that the exportable surplus of these products are increasing because of foreign importations.

## DUKE OF YORK CHAPTER I.O.D.E. ELECTS OFFICERS

The following list of officers was elected by the Duke of York Chapter I.O.D.E. at a regular meeting of the organization on Tuesday evening:

Honorary Regent, Mrs. Helen. Regent, Mrs. Evans.  
1st Vice-Regent, Mrs. McNaughton. 2nd Vice-Regent, Mrs. Wheat. Secretary, Mrs. Moorhouse. Treasurer, Mrs. MacGregor. Standard Bearer, Mrs. Garrett. Echo Secretary, Mrs. Robie. Educational Sec., Mrs. McQuade. Councillors, Mrs. Williamson and Mrs. J.H. Olliphant.

## SERG. R. H. PURDY AWARDED MEDAL FOR SAVING FOUR PERSONS

Word has reached Carbon that Ser. R.H. Purdy of the R.C.M.P., formerly stationed at Carbon and now in the Peace River district, had been presented on February 28th with the bronze medal of the Canadian Humane Society. The presentation was made at St. James' Cathedral in Peace River by Mayor H.E. Sutherland.

The medal was awarded to Ser. Purdy in recognition of his bravery in rescuing four persons from drowning in the Little Smoky River last May 31. Since that time Mr. Purdy has married one of the girls he rescued, Helen Mercer.

## LONG YEARS AGO

March 2, 1921

The local rinks at the Acme bonspiel came back with four fours of gloves.

G.F. Tutt was a Calgary visitor on Monday and came back with a new MacLaurin car.

Len Hay says his tin lizzie is good enough for him.

The financial statement of the Village of Carbon appears in this issue and shows total receipts of \$1818.20, including a balance of \$25.72 carried over from the previous year. No relief or others' allowance was paid.

The Gamble congregation of the Presbyterian church elected the following Board of Managers at its annual meeting on February 11th:

Messrs. Bruce, L.B. Hart, John Clayton, P. Ferguson and M. Clark.

Treating seed grain for bunt and smut

Treating seed grain with a fungicide for the prevention of bunt and smut is a practice that is fast becoming general, especially since the advent of an organic mercury dust which, applied at the rate of only one-half ounce per bushel of seed of wheat, oats or barley, gives usually 100 per cent control of these abominable fungus diseases. Not only does treatment get rid of smut, but germination is promoted and yields of grain are increased notably thereby.

Where formaldehyde was formerly employed for the purpose of the organic mercury dust is rapidly superseding it. The use of formaldehyde implies a wet treatment resulting in swollen grain, difficult to drill evenly, and seriously impaired germination if the treated grain be not sown immediately. The organic mercury dust, on the other hand, may be mixed with the seed grain a month or more before sowing time without risk of seed injury.

For the treatment of seed grain with the dust a new automatic machine has been patented recently and should prove a boon to those who grow grain on an extensive scale. Investigations in progress at the Division of Botany, Central Experimental Farm, Ottawa, have proved that the organic mercury dust not only serves to control smut and bunt but also the root rot of cereals, and this is considered a discovery of great moment.

## HON. CHAS. A. DUNNING ANNOUNCES BUDGET FOR THE YEAR 1937

No New Taxes Have Been Levied on People

Ottawa, March 2.—Without increasing taxation in any form and with numerous downward revisions of the tariff schedule, Hon. C. A. Dunning, Minister of Finance, last Thursday budgeted for an all-over deficit of \$30,000,000 for the fiscal year 1937-38. This compares with a deficit of \$27,000,000 estimated for the current fiscal year which ended last March 31.

Mr. Dunning expressed the hope that next year he would be able to present a balanced budget. The anticipated deficit of the next fiscal year is the amount of the estimated cash deficit of the Canadian National Railways.

In a budget speech overshadowed by the important changes incidental to the Canada-United Kingdom trade agreement, the finance minister announced that the five per cent salary increase now applied to all civil service salaries of \$1200 or more would be restored as from April 1.

Estimates total expenditure for all purposes in the next fiscal year was placed at \$520,000,000 and revenue from all sources at \$485,000,000.

Exports during the calendar year 1936 of \$625,190,343. This was an increase in exports over 1935 of \$189,559,000, and of imports an increase of \$84,876,000. Total trade showed an increase of \$274,655,000.

### ERNST PAYS SUPREME PENALTY

Emmanuel "Happy" Ernst walked to the gallows shortly after 12:00 o'clock early Wednesday morning and paid with his life for the murder of George Pogromer, a former employer.

Mrs. Christina Pogromer, wife of the slain man, and former lover of Ernst had her death sentence commuted to life imprisonment and will spend the rest of her days behind the prison bars of the Kingston penitentiary, the only Dominion jail fitted to accommodate women prisoners.

The weather has been real warm the past few days and thoughts are turning to spring. The snow is rapidly disappearing, although we can expect another cold snap before the break-up.

So far as is known, members of the legume family are the only plants which possess in any marked degree the faculty of absorbing and fixing the nitrogen of the air. The fullest use, possible, therefore, should be made of legumes, clovers, alfalfa, etc., in farm cropping systems, remembering that they will gather nitrogen not only for their own use, but for that of other plants growing with them or after them. In soil that the nitrogen factor in the soil may function properly it is necessary that the plants be not deprived of an adequate supply of phosphate and potash.

ESTATE OF PAT BURNS

VALUE AT \$1,000,000

Estate of the late Senator Patrick Burns is expected to reveal a total valuation of approximately \$7,000,000 when the will is filed for probate.

Succession duties likely to accrue to the Province of Alberta will amount to a great deal more than \$1,000,000, it is stated from reliable quarters. There is said to be large bequests to charitable institutions and benevolent organizations. Faithful employees of the West's cattle king are remembered.

Extensive investments in major Alberta oil companies are part of the assets, and the executors are Rt. Hon. R.B. Bennett and John Burns.

## LADY ROBERTS CHAPTER I.O.D.E. ELECTS OFFICERS

A couple of weeks ago the Lady Roberts Chapter I.O.D.E. elected officers for the year, but owing to some of the ladies withdrawing from positions a new election was in order and resulted as follows:

Regent, Edna Willison; 1st Vice-Regent, Vera Olliphant; 2nd Vice-Regent, Lettie Walker; Secretary, Nellie Walker; Treasurer, Caroline Wright; Standard Bearer, Daphne Friesen; Echo Secretary, Hester Bell; Educational Secretary, Kathleen Smith; Councillors, Margie Reid and Myrtle Olliphant; Pianist, Kathleen Smith.

## S. J. GARRETT TO AGAIN BE MAYOR OF CARBON

At the regular meeting of the Village council on Monday night of this week the following appointments were made for the year 1937:

Mayor, S.J. Garrett.  
Secretary-Treasurer, Alex. Reid.  
Medical Health Officer, Dr. G. L. McFarlane.  
Auditor, John Atkinson.

All by-laws now on the books of the Village will remain as at present, the council agreed, although there may be some changes during the year.

## THE WORLD OF WHEAT (By H.G.L. Strang)

A new wheat variety REWARD has beaten Marquis for the Canadian Championship at Toronto, and the World Championship at Chicago!

In the winter of 1927 the cable dispatches of North America carried this news. Farmers, seed growers and scientific agriculturists were greatly interested. All wanted to know something about the new variety.

Reward wheat, it seemed, gave kernels that were unusually hard, exceedingly uniform and plump, of a beautiful dark red color, and high in weight per measured bushel. It attracted the eyes of the judges then and has done so at every Grain Exhibition ever since.

Reward is the result of a cross between Marquis and Prelude, made by Dr. Charles Saunders in 1912, and selected, by Dr. L. H. Newman, for test in 1923.

In addition to its magnificent appearance Reward is even better than Marquis in milling and baking qualities, and as well is from 5 to 7 days earlier than Marquis.

Here, at last, it seemed, was the perfect wheat for the northern country. Also! Tests eventually revealed that Reward lacked in one character—its yield was definitely lower than that of Marquis, and so it has failed, unfortunately, to fill the place expected.

Following factors have tended to

## YOUNG CURLERS ENJOY BONSPIEL AT CURLING RINK LAST SATURDAY

Prizes Were Donated by Business Men

A juvenile bonspiel between the younger boys and girls of Carbon was held last Saturday at the local curling rink and considerable interest was taken by the young people and the citizens.

Prizes were donated by the following business men: Messrs. Percy Edwards, S. J. Garrett, C. L. MacGregor, C.H. Nash, A. F. McKibbin, L. Paxon.

Two events were played, the Grand Challenge, and the Consolation, and eight rinks were entered in the main event.

The following is the personnel of each rink, the first named being the skip:

Sam Paxon, Bill Barker, David Flaws and Martha Rogers.

Harvey Barker, Raymond Lemay, George Lemay and Elain-Torrance, Malcolm MacGregor, John Gintler, Joe Taylor and Olga Kapanik, Jack Evans, Ralph Atkinson, Albert Brumley and Isabel Goulson, Fergus Greenan, Anna Kapanik, Donald Martin and Marion Torrance.

Bill Cameron, Marjorie Leitch, Bill Dixon and Tommie Goulson, Wilfred Sherry, Donnie Williamson, Marjorie Martin and Frank Leitch, Francis Paxon, Jack Heith, Stanley Goulson and Betty McQuade.

**Grand Challenge Results.**

Sherry defeated Evans, Greenan defeated Cameron, Sam Paxon defeated MacGregor and Barker defeated F.

In the semi-finals Sherry defeated Greenan and Sam Paxon defeated Barker.

In the final game Sherry defeated Sam Paxon.

### Consolation Results

Cameron defeated Evans and Francis Paxon defeated MacGregor.

In the final game Paxon defeated Cameron.

# Avoid Spoiled Dough!

**BAKE WITH ROYAL YEAST**  
It's always full strength

**SPOILED AGAIN! I SHOULD HAVE USED ROYAL**

Each cake of Royal Yeast is sealed in an airtight wrapper—safe from all contamination

YEAST plays an important part in making really appetizing bread. It must be full strength and absolutely pure, to avoid any "off-taste" in the finished loaf.

Royal Yeast is always dependable. Every cake is sealed in airtight wrappers—safe from all contamination and leavening power. And Royal is the only yeast that has this special protection.

For 50 years, Royal has stood for highest quality. Today, 7 out of 8 Canadian bakers use Royal Yeast when they bake a yeast cake. They know it's reliable.

Don't risk taking flak with uncertain yeast. Always use for Royal.

Itch is a common skin trouble. It is caused by dry skin, or by an allergic reaction to some substance. It is relieved by the use of Dr. D.D. Prescription.

Dr. D.D. Prescription is a powerful skin medicine. It is used for all skin troubles. It is sold in 10-cent and 25-cent bottles.

# Thou Shalt Not Love

A NOVEL BY  
— GEORGIA GRAIG

CHAPTER XVIII.—Continued

The doctor smiled on her benignly. He had noticed her new wedding ring when she had stripped the gloves from her slender fingers.

"I had hoped you would come back."

"I have often wondered since what happened to you. However, judging by that—no, indeed, your shining ring—you evidently took what advice of mine you were able to get through your heart. You've found your vital interest in life. It would appear your saving interest."

Starr's head was in a whirl. She hardly knew to believe what he said. Her ears heard, this wonder story that was coming so casually from the lips of the man she had long believed had condemned her. She leaned forward, eyes pleading, her body tensed.

"You mean there's nothing the matter with me?" she asked through lips that quivered.

He smiled, and his shoulders shook. He was earnestly looking out any thorough examination. I would say that you are just about as normal as any young woman of your age. A little too thin, too pale, perhaps. Anemic. Or it could be from worry."

"Or it could be from worry," he went on, looking at her straight in the eyes, as his capable fingers tapped on his desk in emphasis. "Young lady, I don't know much about her. She should have written him of what she had really done, let him know of the curse of Tut-Amara and what it had done to her. He would have been able to explain the effect it has on the mind of its victim. When you believe a thing with all the strength that is in you, it is quite likely to come true. That's all there is to it, and in your case you were making it come true. Curse of Tut-Amara—hunk!"

"Starr said, in a still small voice of one who was trying to reconcile a fact with a theory," John Leasing? "Yes."

"That man who died on the night of the Leasing, did you say his name was—died of a tropical fever which must have been coming on for some time, and would not doubt have taken him away from you or no cure. Your father was an elderly man, a scholar of sedentary habits who could not stand much strenuous outdoor life. Moreover he had delved into Egyptian lore so long that it was inevitable it would have its effect on him. Superstition and grief over the death of his friend preyed on his mind, until he became obsessed with the idea that he would be the next victim. He was the victim of his own terror. Something like this is happening to you, but you seem to have outgrown it to a great extent, if not entirely. Thank heaven for that. He smiled again at her, his head shaking as he said, "You don't go on any more digging trips to Egypt. . . . Hunk, that one thing left for her to do now. She must go away from this place quickly and silently. And then in that moment, just before the tapestry curtain dropped, her still white face glowed as she saw her. He cried her name incredulously:

"Starr!"

In an instant all was confusion. His Michael was at her side in two leaps. He picked her up and carried her inside the living room. His arms were holding her. He was kissing her on tips and hair and eyes, starved kisses, as though he would never have enough.

Somehow, in the excitement, Stephanie had slipped away. Starr caught her, and she slipped away again through the entry way before the outer door banged on her. Starr and Michael were alone. And Michael was saying:

"I only she had waited, and talked the matter over with him then! What pain and terror she would have been saved! But, on the other hand, if she had, the whole course of her life would have been different. She might never have met Michael!"

She had worked out her own salvation, even though she had plucked the depths of human suffering. She was free. Free to live, to love!

It was with that idea singing in her heart, a poem of joy and gladness, that Starr, her cheeks tingling, set out on a journey of discovery to the doctor who had brought back life to her. He smiled again as he got up and went to the door. He opened it and said to the competent

young woman in a nurse's uniform:

"Please take Mrs. Fairbairn into the examination room, Miss Walker. I'll be with you presently."

It was a woman who felt as if she had been newly born into a world that was the epitome of joy and gladness who made her way through the busy city streets, headed for her own penthouse apartment. A woman with a golden glory racing through her veins. Her head was up proudly. Eyes and lips laughed their sheer joy into the face of the world that suddenly was a marvelously glad, happy place—all of it.

A miracle had happened. There might be those who would attempt to explain it away with prosaic words, but Starr Ellison Fairbairn knew that it was a miracle.

She was free! Free of the dread that for years had made life a nightmare. Free—and she had never had a baby! Michael's child, and hers! She was going back to Michael.

It was all so joyous that not until she stood on the threshold of her home from which she had fled did she remember the circumstances of her leaving. She had only been thinking how glad Michael would be to see her home again.

The wonderful news she would bring him. Now she remembered. . . . Michael's head she had run away with. Lancer Marlowe! All during those years she had faced death alone in a summer New York rooming house and believed that she was in Lancer's arms.

Swift alarm came a darkening shadow over her straight in the eyes, as his capable fingers tapped on his desk in emphasis. "Young lady, I don't know much about her. She should have written him of what she had really done, let him know of the curse of Tut-Amara and what it had done to her. He would have been able to explain the effect it has on the mind of its victim. When you believe a thing with all the strength that is in you, it is quite likely to come true. That's all there is to it, and in your case you were making it come true. Curse of Tut-Amara—hunk!"

"Starr said, in a still small voice of one who was trying to reconcile a fact with a theory," John Leasing? "Yes."

In an instant all was confusion. His Michael was at her side in two leaps. He picked her up and carried her inside the living room. His arms were holding her. He was kissing her on tips and hair and eyes, starved kisses, as though he would never have enough.

Somehow, in the excitement, Stephanie had slipped away. Starr caught her, and she slipped away again through the entry way before the outer door banged on her. Starr and Michael were alone. And Michael was saying:

"I only she had waited, and talked the matter over with him then! What pain and terror she would have been saved! But, on the other hand, if she had, the whole course of her life would have been different. She might never have met Michael!"

She had worked out her own salvation, even though she had plucked the depths of human suffering. She was free. Free to live, to love!

It was with that idea singing in her heart, a poem of joy and gladness, that Starr, her cheeks tingling, set out on a journey of discovery to the doctor who had brought back life to her. He smiled again as he got up and went to the door. He opened it and said to the competent

young woman in a nurse's uniform:

"Please take Mrs. Fairbairn into the examination room, Miss Walker. I'll be with you presently."

It was a woman who felt as if she had been newly born into a world that was the epitome of joy and gladness who made her way through the busy city streets, headed for her own penthouse apartment. A woman with a golden glory racing through her veins. Her head was up proudly. Eyes and lips laughed their sheer joy into the face of the world that suddenly was a marvelously glad, happy place—all of it.

A miracle had happened. There might be those who would attempt to explain it away with prosaic words, but Starr Ellison Fairbairn knew that it was a miracle.

She was free! Free of the dread that for years had made life a nightmare. Free—and she had never had a baby! Michael's child, and hers! She was going back to Michael.

It was all so joyous that not until she stood on the threshold of her home from which she had fled did she remember the circumstances of her leaving. She had only been thinking how glad Michael would be to see her home again.

The wonderful news she would bring him. Now she remembered. . . . Michael's head she had run away with. Lancer Marlowe! All during those years she had faced death alone in a summer New York rooming house and believed that she was in Lancer's arms.

Swift alarm came a darkening shadow over her straight in the eyes, as his capable fingers tapped on his desk in emphasis. "Young lady, I don't know much about her. She should have written him of what she had really done, let him know of the curse of Tut-Amara and what it had done to her. He would have been able to explain the effect it has on the mind of its victim. When you believe a thing with all the strength that is in you, it is quite likely to come true. That's all there is to it, and in your case you were making it come true. Curse of Tut-Amara—hunk!"

"Starr said, in a still small voice of one who was trying to reconcile a fact with a theory," John Leasing? "Yes."

Coronation Broadcast

Not Merely The Empire, But The Whole World Will Listen

Not merely the empire but the world will listen to the coronation ceremonies May 12 inside and outside Westminster Abbey. This, the first coronation to be broadcast, will reach out in English and foreign tongues from a battery of 50 microphones.

The ear marshal is considering the feasibility of setting up television machinery in the abbey for the actual coronation. In any event Sir Stephen Tallents, of the British Broadcasting commission, hopes and expects the outside processions will be caught on the wireless screen in their full panoply.

King George VI will likely conclude the momentous day with a personal message to his subjects. This will probably be delivered at 8.00 p.m. G.M.T. (1 p.m. M.S.T.).

Twenty microphones will be established about the altar and every audible detail of the service will be caught. Along the route microphones will be posted at strategic points. A number of observers will describe the passing scene.

The coronation day broadcast will start this afternoon, 10.15 a.m. G.M.T. (the procession times are estimated on the basis of precedent) when the king will begin his Buckingham palace to the abbey. And the abbey broadcast is likely to start from 11.15 a.m. until 2.15 p.m.

While the king is in the abbey there may be a break until the return procession begins at about 3 p.m. But this lapse is not definitely settled yet. The return procession will be covered with even greater magnificence, the scenes at Trafalgar Square, St. James's palace and Oxford Circus to be given special attention.

The evening's schedule includes a program at 6.30 p.m. entitled "The Empire's Home," which will link up the king with the empire and the world. The program will be featured by individual messages of loyalty from each dominion and colony. This will be followed by a greeting from the United Kingdom spokesman, perhaps Prime Minister Baldwin. And then the king's Majesty will probably speak.

The evening's schedule includes a program at 6.30 p.m. entitled "The Empire's Home," which will link up the king with the empire and the world.
